Q-Roll Golf Receives “Best of Show” Honors from Golfing Magazine

PALM BEACH GARDENS, Fla. — Q-Roll Golf and its patented Radius Face™ Technology line of precision CNC milled putters received a “Best of Show” Award from Golfing Magazine at the 2007 PGA Merchandise Show held in Orlando, Florida at the end of January, 2007. With over 1200 exhibitors and 500,000 square feet of exhibition space, the PGA Merchandise Show and all the new products introduced can be a little overwhelming, so Golfing Magazine established its “Best Of Show” list to help their readers decipher “What's Hot” in golf equipment for 2007.

Q-Roll’s patented Radius Face™ Technology has led to several performance awards over the past 2 years, including consecutive Player’s Choice Awards for Best Distance Control from hands-on player testing administered by Golfing Magazine.

Q-Roll’s Radius Face™ putters make contact above the equator of the golf ball, thereby imparting immediate top-spin, and developing a true roll that aids in both direction and distance control.

Q-Roll putters automatically deliver to any golfer, of any skill level, a roll that is at least equal to, or better than, the roll produced by top PGA, LPGA, Champions Tour and Nationwide Tour pros... unless of course those pros are using a Q-Roll putter.

All of Q-Roll’s *Classic Series* putters feature the same patented Radius Face™ technology. The 2007 lineup includes the Classic Series, comprised of Models I, III, IV, and VI, and the new *Monarch* putter, which is scheduled to begin shipping in the summer of 2007.

For more information on Q-Roll Golf call 1-866-QROLLGO or visit the website at www.qroll.com

Media members interested in testing a Q-Roll putter for an editorial review should contact: Joe Wiczorek: joe@themediagroupinc.com or Bart Henyan: bart@themediagroupinc.com of The Media Group, Inc. at 847-956-9090.
